

## Events (Optiqo Display)

The screenshot shows the OPTIQO interface for viewing events. The top navigation bar includes the OPTIQO logo, a hamburger menu, and user information (Main customer, Optiqo Admin). The left sidebar lists various menu items, with 'Events' selected. The main content area is titled 'Events (optiqo display)' and features a 'Refresh' button, a 'Reset' button, and a 'Show filters' button. Below these buttons, it displays 'Events (0)' and 'Next refresh at: 09:49'. A table with the following columns is visible: Date, Employee, Groups, Comment, Customer, Building, Address, Storey, Description, and Cleaning frequency. The table is currently empty.

This is where all the events from Optiqo Display will be shown.

This screenshot shows the same OPTIQO interface but with filter options expanded. The 'Status' dropdown is set to 'Any'. The 'From' and 'To' date pickers are both set to '2018-01'. The 'Attributes' section is empty. The table below the filters is currently empty. At the bottom right, there are buttons for 'Refresh', 'Reset', and 'Hide'.
