

Sent notifications

The screenshot shows the 'Sent notifications' page in the OPTIQO application. The left sidebar contains a navigation menu with items like Customers, Users, Users/Groups, Notifications, Key figures, Cleaning frequencies, Control groups, Contracts, Inspections, Work orders, Reports, Events, and Sent notifications. The main content area displays a table of notifications with columns for Date, From, Email, Comment, Notification, Trigger on, Trigger source, and Customer. The table lists 14 notifications, each with a timestamp, sender name, email, comment, notification type, trigger event, and source.

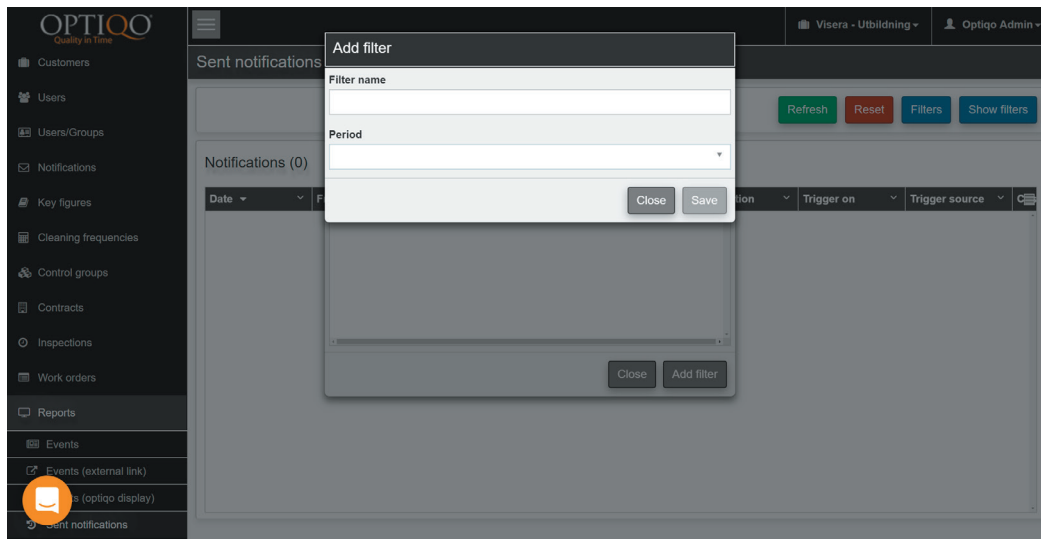

Date	From	Email	Comment	Notification	Trigger on	Trigger source	Customer

This is where you see all the sent notifications. These can come from inspections or work orders.

The screenshot shows the 'Sent notifications' page with the filter function open. The filter form includes fields for Contract, Employee, Email, Key figure, Unit number, From (date range), Building, Hygiene profile, Description, Trigger on, Trigger source, Storey, Quality profile, and Tag ID. Below the filter form, the notification table is visible, showing the first row of data.

Date	From	Email	Comment	Notification	Trigger on	Trigger source	Customer
